

"4th leg" Geothermals in the global smart viable transformation process.

- Next generation investigations and explorations
- Low enthalpy focus
- Smarter integration/applications

NxGeo 2.0™
– Next generation smarter geothermal systems for Viable Cities.

- Thermal energy heating/cooling
- Electricity
- Cascade thermal flows

The Nordics already today has the world's highest penetration of shallow geothermal energy systems per capita!

With NxGeo 2.0 we and the world take the next steps!

- EMEA
- Americas
- Asia
- Eurasia
- Oceania

Viable Cities™
